

The Pointer Tool

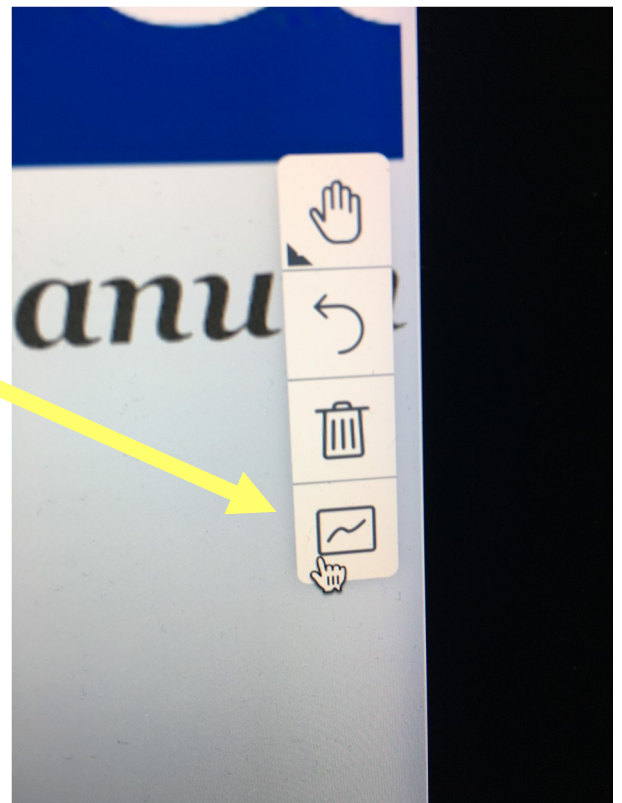

As the trainer you begin EducateOnline as the moderator.

The participants can always see the moderator's cursor when it is over the whiteboard.

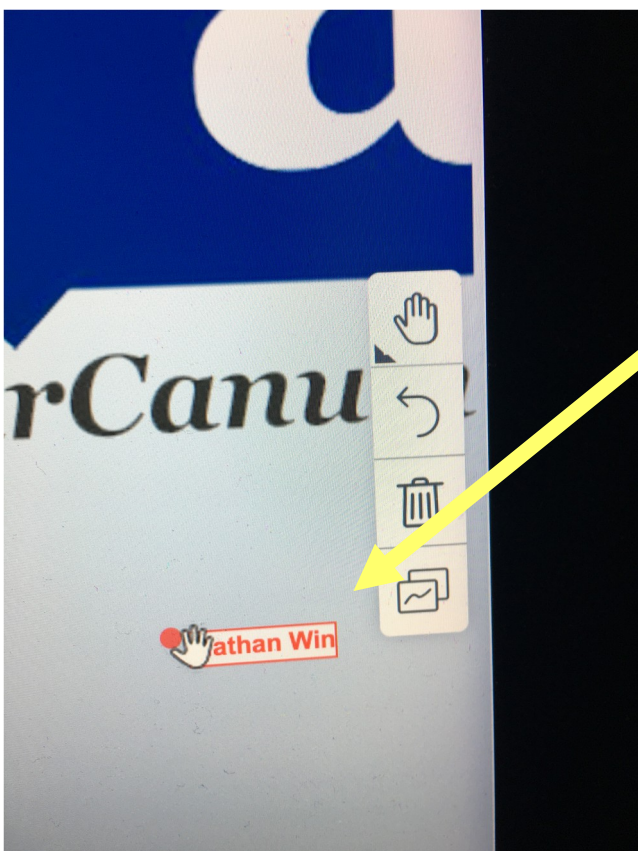

You can click on this icon to enable the participants to also show their cursor.

They will also be able to write/draw on the whiteboard.

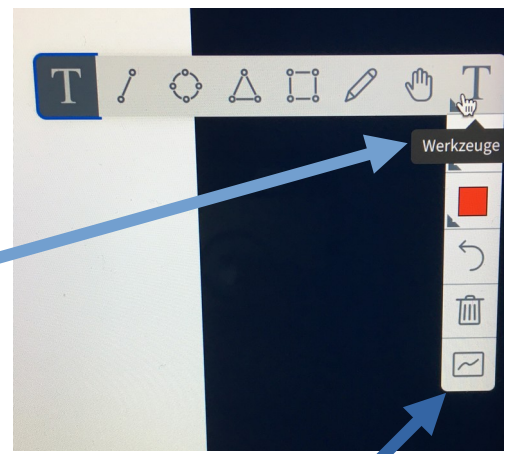

Now you can all see each other's cursor on the whiteboard with each participant's name!

Achtung: When in screensharing mode, your cursor will not be visible on the whiteboard itself. However, it will be visible in the application or window which you are sharing.

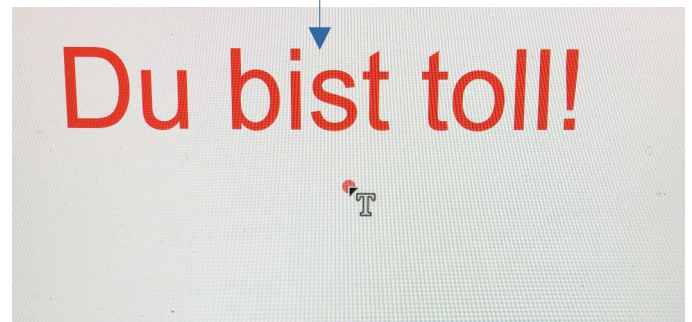

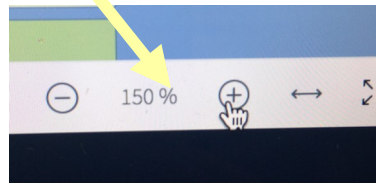

The Text Tool

With the Text Tool you and your students can write text on the whiteboard and the documents which you upload to the whiteboard.

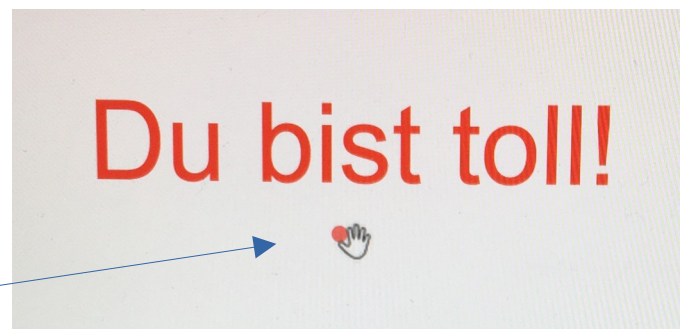

Click here to allow your students to also write on the whiteboard.

You can use tools at the bottom of the whiteboard or the scroll button on your mouse in order to zoom in and out on the whiteboard.

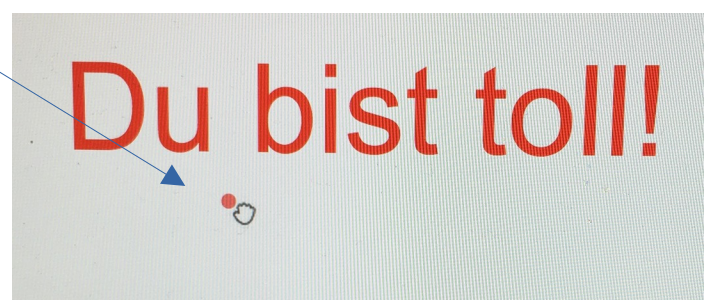

When you are zoomed in to a part of the whiteboard and you would like to move to a different part of the whiteboard, then just hold down the spacebar on your keyboard.

The Text Tool will change into a hand and you can use it to click and drag your viewpoint to a different part of the whiteboard.

Release the spacebar and the Text Tool will return.

Achtung: Du bist toll.
